Clickable GSIM

Clickable GSIM

Clickable GSIM is an interactive way to explore GSIM. There are a number of views through which you can explore. You can look at the entire model on the "GSIM on a page" view, or you can explore the objects in each GSIM group (Base, Business, Concepts, Exchange, Structures).

On these broad views of GSIM, you can click on any objects and it will take you to a page which shows you what other information objects it is related to, as well as the definition and attributes of the object. You can also go straight to the page for an individual object from the list of objects shown in the left hand navigator.

Broad views

	GSIM on a page
	Base Group provides features which are reusable by other objects to support functionality such as identity, versioning etc
	Business Group is used to capture the designs and plans of statistical programs, and the processes undertaken to deliver those programs.
	Concepts Group is used to define the meaning of information to provide understanding of what the data are measuring.
