2. Economic Statistics
3. Environment & Multi-domain Statistics
4. Methodology of Data Collection, Processing, Dissemination & Analysis
5. Strategic and Managerial Issues of Official Statistics

## 1) Basic Information

Training material title
Training video on Developing Gender Statistics - Advocacy/( - )
Brief description and comments

This video is intended for users and producers of statistics, middle and senior staff in statistical organizations, policy and decision makers, academia and stakeholders interested in gender statistics. English and Russian versions are available.

Gender statistics is a field that cuts across all areas of statistics. It is about identifying, producing, disseminating and analysing statistics to understand how gender issues affect individuals and society. It is a way to show how gender differences can affect the economic and social development of societies. Gender statistics is not about women only, but about the role of both women and men in the society. It's about making better statistics.
