

Seasonal adjustment - European Statistical System (ESS) Guidelines

1) Basic Information

Training material title
Seasonal adjustment - European Statistical System (ESS) Guidelines
Brief description and comments

The guidelines have been endorsed by the Statistical Programme Committee on 14 February 2008 which supported their implementation by statistical domain and country.

The guidelines cover all the key steps of the seasonal and calendar adjustment process. The structure is made in a friendly and easy to read framework, useful as well as for experienced users and beginners.

Main category

Economic Statistics
