Brief description and comments

The development of gender statistics follows recognition of gender as an important issue for social and economic development. Each individual statistical system must adapt how it develops gender statistics to its particular situation.

The following issues are to be considered and will be covered in this presentation: Developing alliances, Top management support, Funding, Legal, Program and Organizational issues.

Audience: It is intended for users and producers of statistics, middle and senior staff in the Statistical Offices, policy and decision makers, academia, and stakeholders interested in gender statistics.
