

Training video on Measuring informal employment/

1) Basic Information

Training material title
Training video on Measuring informal employment/
Brief description and comments

Informal employment and employment in the informal sector play an important role for employment creation, income generation and poverty reduction in many countries. Informal employment comprises one half to three-quarters of non-agricultural employment in developing countries, playing an increasingly important role in countries in transition and is on the rise as well in developed countries.

Audience: It is intended for users and producers of statistics, middle and senior staff in statistical organizations, policy and decision makers, academia and stakeholders interested in gender statistics.
