

Inventory of International Groups

The High-Level Group for the Modernisation of Statistical Production and Services (HLG) has created an inventory giving an overview of the different international groups whose work is related to the enterprise architecture of statistical organisations. These groups, and their relationships to the HLG are shown in the following diagram. The groups have been asked to complete a template outlining their activities and outputs. This information is available from the table below the diagram.

How the High-Level Group Relates to Other Bodies

More Information about These Groups
