

Matching and Integrating Data from Different Sources

1) Basic Information

Training material title
The Use of Administrative Sources for Statistical Purposes: Matching and Integrating Data from Different Sources
Brief description and comments

This presentation introduces the concept of matching, explaining what it is and why it is necessary in the context of increasing use of administrative data and integration of data from mixed sources. It outlines approaches for automatic matching, using the UK experience as an example.

Main category

Methodology of Data Collection, Processing, Dissemination & Analysis
