

Data Visualisation

1) Basic Information

Training material title
Data Visualisation guide
Brief description and comments

Guide written by Edwin de Jonge of Statistics Netherlands as part of their 'Statistics Methods' series. The guide discusses the goals and history of data visualisation, gives some general guidelines, and then looks in detail at recommendations for specific kinds of visualisation, including different sorts of diagrams (e.g. pie charts, bar charts, etc.) and thematic maps.

Main category

Methodology of Data Collection, Processing, Dissemination & Analysis
